Profile Summary

Final-year B.Tech Computer Science and Business Systems student with hands-on internship experience in full-stack and Android development, automation, and AI/ML. Strong foundation in programming, backend development, data analysis, and system fundamentals. Seeking entry-level software engineering or internship roles.

Technical Skills

Programming Languages: C, C++, Java, Python, JavaScript
Web Technologies: HTML, CSS
Frameworks & Libraries: React, Django, Flask, Jinja2, Bootstrap, NumPy, Pandas
Backend & APIs: REST APIs
Database: MySQL
Data Visualization & BI: Power BI
Cloud Platforms: AWS (EC2, S3, IAM – fundamentals)
DevOps & Deployment: Docker, CI/CD
Tools: Git, GitHub, Linux, VS Code
Computer Fundamentals: DSA, DBMS, OOP

Education

B.Tech – Computer Science and Business Systems	2022 – 2026
• Techno India University, Kolkata	CGPA: 7.95
Class XII – Science	2020 – 2022
• Barasat P.C.S. Govt. High School	86.20%
Class X	2014 – 2020
• Rameswarpur Union Adarsha Vidyalaya	94.29%

Professional Experience

SWE Intern (Android) — Google – AICTE [Link]	Oct 2024 – Dec 2024
• Developed Android applications using Java, implementing UI components and activity lifecycle management.	
SWE Intern — IBM [Link]	Nov 2024
• Designed and validated LLM-based chatbot workflows with focus on response accuracy and conversational flow.	
SWE Intern — UiPath [Link]	Sep 2024
• Automated business processes by developing and testing RPA workflows using UiPath Studio.	
SWE Intern (AI-ML) — Google – AICTE [Link]	Jul 2024 – Sep 2024
• Applied machine learning techniques for data preprocessing, model training, and evaluation.	

Projects

MED-IN-INDIA [Link]	Web Platform
• Developed a healthcare platform connecting patients, doctors, and administrators.	
• Implemented appointment scheduling, payment verification, and hospital location services.	
• Integrated organ and blood donation management with a medical support chatbot.	
• Technologies: HTML, CSS, JavaScript, PHP, MySQL	
Recipe GPT [Link]	Full-Stack Application
• Built a recipe recommendation system based on available ingredients.	
• Developed responsive UI with backend integration using Flask and REST APIs.	
• Technologies: HTML, CSS, JavaScript, Flask, REST APIs, MySQL, Jinja2	
Anime Recommendation System [Link]	Recommendation System
• Built a recommendation system suggesting anime titles based on user preferences and popularity using filtering techniques.	
• Processed and analyzed datasets sourced from CSV files to generate recommendations.	
• Technologies: Python, HTML, CSS — Data Source: CSV	
Amazon Clone [Link]	Full-Stack Application
• Developed a full-stack e-commerce clone with product listings, search, cart, and user authentication.	
• Implemented core frontend functionality and user interaction flows.	
• Technologies: HTML, CSS, JavaScript	
Car Rental System [Link]	Desktop Application
• Developed a Java-based desktop application for managing car rentals.	
• Implemented user registration, vehicle availability, booking, and billing workflows.	
• Technology: Java	

Certifications

Certification of THE AGNIRVA SPACE INTERNSHIP PROGRAM (ISRO) [Link]
Certification of Threat Modeling (Infosys) [Link]
Python Beginners to Advanced Bootcamp (Udemy) [Link]
Cyber Security Awareness Programme — NIELIT [Link]
Course on Computer Concepts — NIELIT [Link]

Position of Responsibility

Participated in WHO program for monitoring and evaluation of the NTDs 2021–2030 roadmap
Member of National Sports & Physical Fitness Board
